## Summary

I have experience in the development and designing of web pages, and applications / web services. Extensive experience and knowledge to develop designs that adapt to all kinds of devices, and with enough capacity to intervene in the frameworks utilized to give more details to achieve more demanding and detailed graphics objectives. I also have the experience to look into solutions and options in front of problems that can surpass my knowledge, thus adding more tools to my repertoire. My experience is mostly freelance work, in which I learned to detect the necessities of the client in an efficient way, making my work meet the expectations of what they really want.

## Knowledge

- NodeJS - Basic
- JavaScript
- Bootstrap
